

Warranty and Disclaimer Bamboo Products

DEFECTS AND VARIATIONS: Modern Vessel products are hand-crafted from natural materials. As such they are not guaranteed to be flawless. Bamboo panels are made of hundreds of strips of bamboo. Inherent variations and very minor flaws are to be expected or even desired. There may be slight variations of shade from one panel to the other. While we reasonably attempt to match shades closely it is not always possible in production.

WARRANTY: We do not warrantee or guarantee our wood sinks past arrival to the customer. As wood is a material that requires sealant & maintenance improper care, cleaning practices, harsh chemicals, non re-application of sealant when signs of need appear are all out of our control. Any signs of water not "beading up" repelling off or sheeting entirely off the surface should be signs of concern for the installer and customer. The customer will eventually need to un-install and apply sealant or matt finish polyurethane sealant as needed as part of the routine care of this item. That includes the areas of heaviest need including the drain area. The customer needs to judge when the routine care is needed.

CARE and CLEANING: Please follow these simple guidelines to get many years of trouble free use from this product.

- Use any extra mild liquid household cleaners, but simple soap and water with towel drying works the best.
- Never use harsh cleaning chemicals or abrasives.
- Never use liquid or powdered cleansers containing gritty abrasives.
- Simple soap and water or organic window cleaning products are enough for cleaning the surface of this product.
- Use only soft cloth or sponges for wiping. Avoid any scouring pads or rough surfaces for cleaning or rubbing this product.
- Small spots are easily cleaned with cotton swabs or an old tooth-brush.
- If the finish on your sink should become damaged by improper cleaning or accidental impact it can be refinished by uninstalling and applying a new interior and exterior polyurethane finish and re-install.
